### Project Scope

Sutton Grammar for Girls established in 1929, and rated "outstanding" by Ofsted in 2008, required 120m<sup>2</sup> of soundproofing and reverberation control for their large Sports Hall facility. CMS Superphon recommended UK Acoustic Systems directly to Sutton Grammar School to Supply and Install CMS Superphon Class 'A' Sound Absorption Wall Panels, so as to ensure a high quality and speedy installation, with panels fitted to ensure the highest possible performance within the noisy Sports Hall environment.

Our experience and expertise with reverberation control at Sports Halls in Schools and Leisure Centres meant we could provide the optimum solution for impact panels to be fitted at the high roof level to ensure noise and echo was substantially reduced to more acceptable tolerances. Our Site Survey identified the many reflective surfaces causing the most issues so that the larger areas could be easily treated.

The CMS Superphon Wall Panels are excellent for sound absorption, especially in large open spaced areas, as they "soak" up the noise, therefore reducing reverberation levels but also covering a wide area with an aesthetically pleasing installation.
